CENTER FOR NEUROREHABILITATION

Building a Sustainable Program
for the Future

OUR MISSION

To provide access to affordable and ongoing physical therapy and advanced technology for all individuals with neurological mobility challenges.

one step at a time

CAPITAL CAMPAIGN ANNOUNCEMENT

We are excited to announce that through the gracious assistance of Anne and Michael Spellings, we have secured a long-term home for our much-needed mobility program. Our lease at 2605 Dolores Way, Carbondale, CO begins in July 2024 with an open end-date. We extend our heartfelt thanks to the Spellings family who stepped-up to invest in this property for the sole purpose of supporting Bridging Bionics for now and the future.

This new space will serve as our primary facility, as we transition from the Snowmass Club property we have enjoyed since 2016. Our goal is to make the Carbondale space a permanent home for BBF by raising the funds needed to own the property outright.

We need your support to make our **Center for Neurorehabilitation and Health Maintenance** a reality. Help us open our doors to a new center of healing and health that will serve as the heart of our program. With your financial contribution this space will become our primary program center for years to come.

OUR NEED FOR A PERMANENT FACILITY

We currently operate from two locations, one in Snowmass Village and the other in Glenwood Springs. With the lease agreement at the Snowmass Club ending December 31, 2024, combined with an expanding equipment inventory, and an increase in client demand, we determined we needed to obtain a larger space with a long-term ownership.

The warehouse space at 2605 Dolores Way will readily meet our immediate needs and can become our primary neurorehabilitation center for the future. We plan to maintain our space at Midland Fitness in Glenwood Springs to better serve clients along the I-70 corridor from Grand Junction to Avon.

The new Carbondale property includes 1,824 square feet of warehouse space with a welcoming, open floor plan and high ceilings necessary for our equipment. Further features include a large, ADA accessible bathroom, large overhead garage door to make equipment move-in easy, and lots of natural light. The move-in ready interior requires minimal build-out costs to add a comfortable reception area, a small kitchenette, and ample storage. The ADA parking near the front entrance and the central mid-valley location near Hwy 82, with easy access to RFTA Transportation and the Rio Grande Trail, make the space ideal for our permanent home.

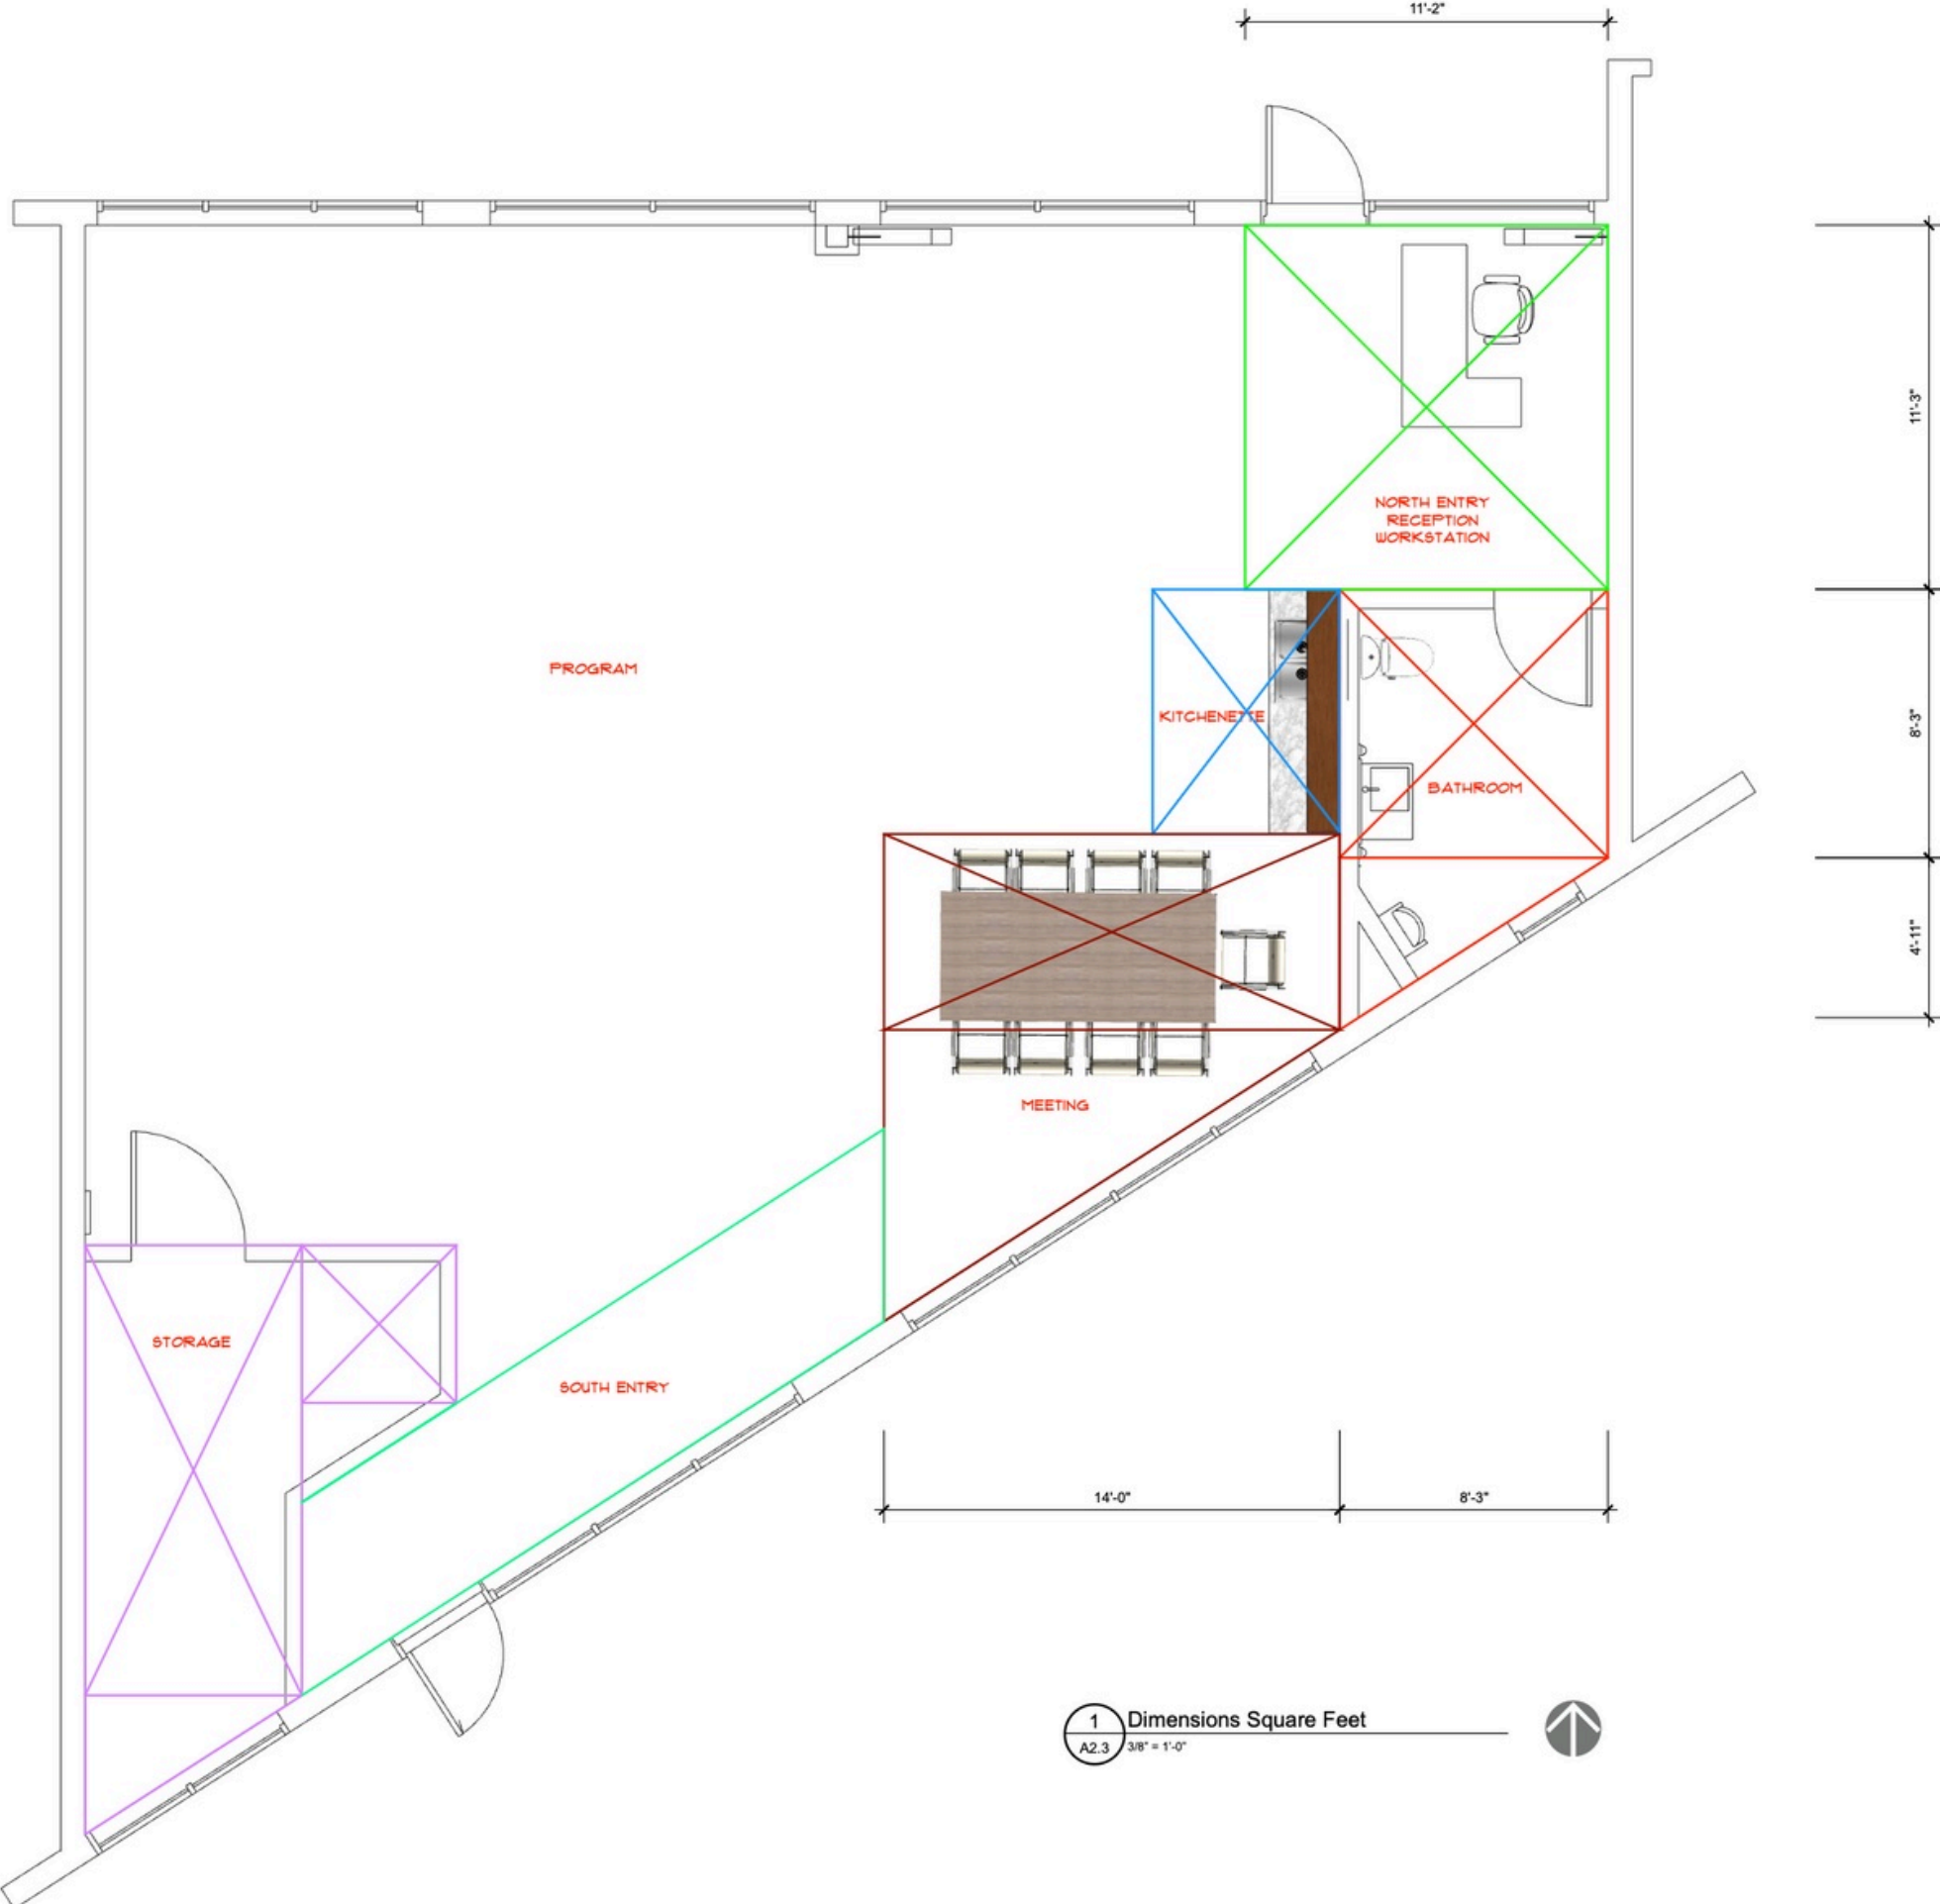

2605 DOLORES WAY, CARBONDALE

MINIMAL BUILD OUT

The space at 2605 Dolores Way is basically move-in ready and will require a minimal build out consisting of a storage area, a small kitchenette, shelving for miscellaneous equipment, installation of gym mirrors, and a reception work station for our clinical team.

The open floor plan will be more conducive to our team members working concurrently with BBF athletes.

THE CENTER FOR NEUROREHABILITATION WILL..

- Establish a long-term facility to serve as the primary location for our much-needed program.
- Expand our footprint with a welcoming, open floor plan with high ceilings to accommodate our equipment.
- Improve our ability to deliver high quality service for our clients, with the potential for our physical therapists to work concurrently to better suit our increasing client demand.
- Provide a larger accessible and flat walking area inside and outside (summer months) for exoskeleton usage.
- Serve clients in a more centralized mid-valley location that is near Hwy 82, with easy access to RFTA Transportation.
- Provide more accessible parking near front entrance.

With your donation, we can turn this dream into a reality.

THE CAPITAL CAMPAIGN NEED

Budget

01 \$1,000,000 Capital Acquisition
Includes:

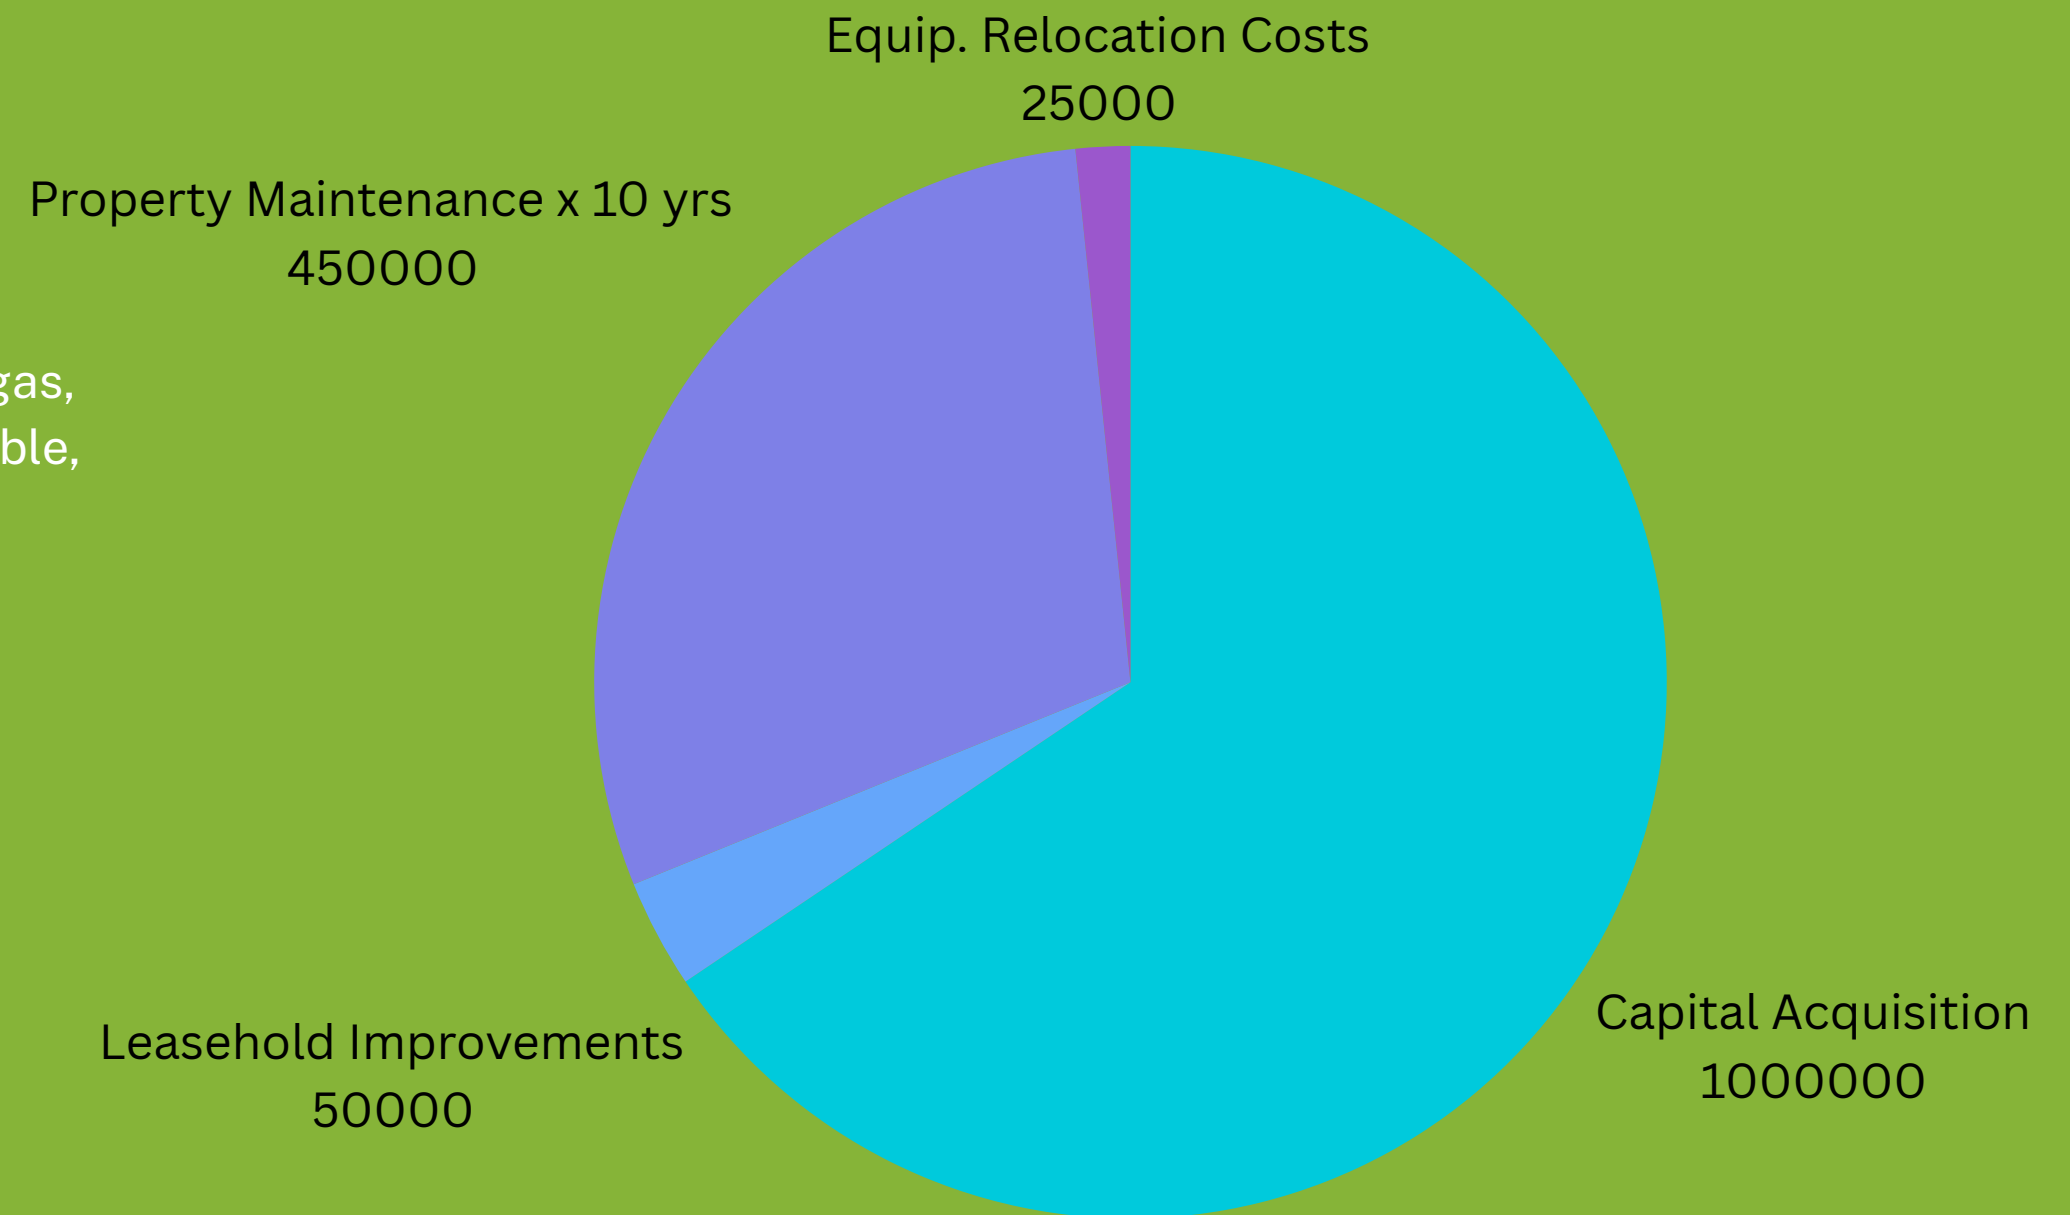

- \$23,600 / year Taxes & HOA dues
- \$6,000 / year Utilities (Electric, gas, water, internet, Cable, Phone)

02 \$50,000 Leasehold Improvements

03 \$450,000 Property Maintenance x 10 years

04 \$25,000 Equip. Relocation Costs

\$1,525,000 TOTAL CAMPAIGN GOAL

NAMING OPPORTUNITIES

Our naming opportunities provide legacy by acknowledging an individual, family, or group, while making a meaningful contribution to our community. There is no better way to honor the memory of a loved one, the accomplishments of a family member, or to permanently link your own name with Bridging Bionics' mission than through a naming opportunity.

We are grateful for gifts of any size.

The Center for Neurorehabilitation's entire space can be named after a person or persons, organization or corporation to honor their commitment to our organization.

NAMING OPPORTUNITY

- Entire space

INVESTMENT

- \$1,000,000

RECOGNITION

We will honor your gift in naming the building space, The _____ Center for Neurorehabilitation, with recognition in our publications, and on our Gratitude Wall.

- Gratitude Wall

- Any gift from \$25,000 - \$999,000

We will honor your gift with recognition in our publications, and on our Gratitude Wall.

BRIDGING COMMUNITY

Help us open our doors to a new center of healing and health maintenance that will serve as the heart of our program. This space will become our primary neurorehabilitation center for years to come.

We need your support to make our Center for Neurorehabilitation a reality.

Think of **giving** not as a *duty*, but as a ***privilege***.

Your gift will provide a future of generosity to ensure our programs continue to support individuals in need, both today and for years to come. Contact Bridging Bionics Foundation to make your legacy-gift today, and help bring our vision to life. Together we can bridge community, bridge mobility, and bridge lives one step at a time.

MEET THE TEAM

*Founder &
Executive Director*
Amanda Boxtel

Paralyzed from a skiing accident in 1992, Amanda knows firsthand how bionic exoskeleton technology and physical therapy has a positive impact on quality of life. She has an indelible desire to give back to others, which is why she founded Bridging Bionics. Realizing her vision of a long-term facility for the organization will leave a lasting footprint on our community and help many individuals regain mobility and live their best life.

Board Treasurer
Dave Portman

Dave is the Market President, First Bank – Roaring Fork Valley and has served as Treasure for our Board of Directors since March, 2020. Dave has vast non-profit experience spanning over two decades, and he is passionate about Bridging Bionics' mission. Dave is instrumental in helping bring the long-term primary facility of the organization to life.

Board Member
Anne Spellings

Anne is a huge fan and supporter of Bridging Bionics Foundation. After her son Mason sustained a chronic cervical spinal cord injury from a motocross accident on March 9, 2019, Bridging Bionics not only enabled him to stand upright and begin stepping on his own, the program also gave him hope and courage. Anne and her husband Michael live between Houston and the Roaring Fork Valley, and they continue to be an integral part of our Bridging Bionics family.

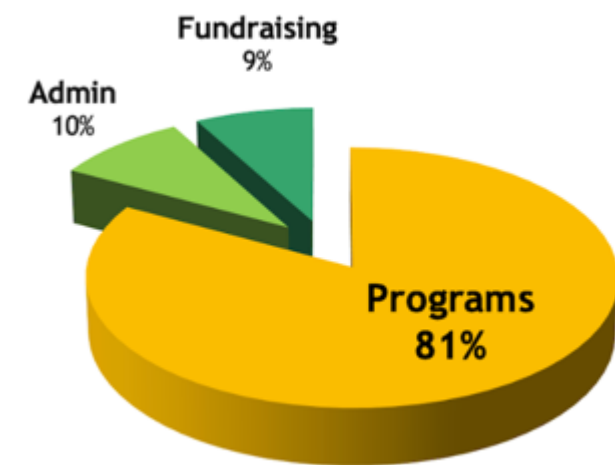

*Development
Consultant*
Zander Higbie

Zander has helped direct the fundraising efforts of Bridging Bionics for the past 4 years, and Aspen Santa Fe Ballet for the past 18 years. He has taught alpine and adaptive skiing for Aspen Skiing Company and Challenge Aspen for more than 20 years, building a ski school client base that includes many Bridging Bionics participants.

OUR FINANCIALS

Strong financial performance supports a sustainable future. Year-over-year results reflect increasing donor investment, well-managed expenses, and stable cash assets to support programming needs. Our organization operates efficiently and responsibly with mission-focused spending, using 81% of funds to directly benefit those in need.

Financial Performance

Together, we can bridge community, bridge mobility, and bridge lives, one step at a time.

giving the gift of mobility

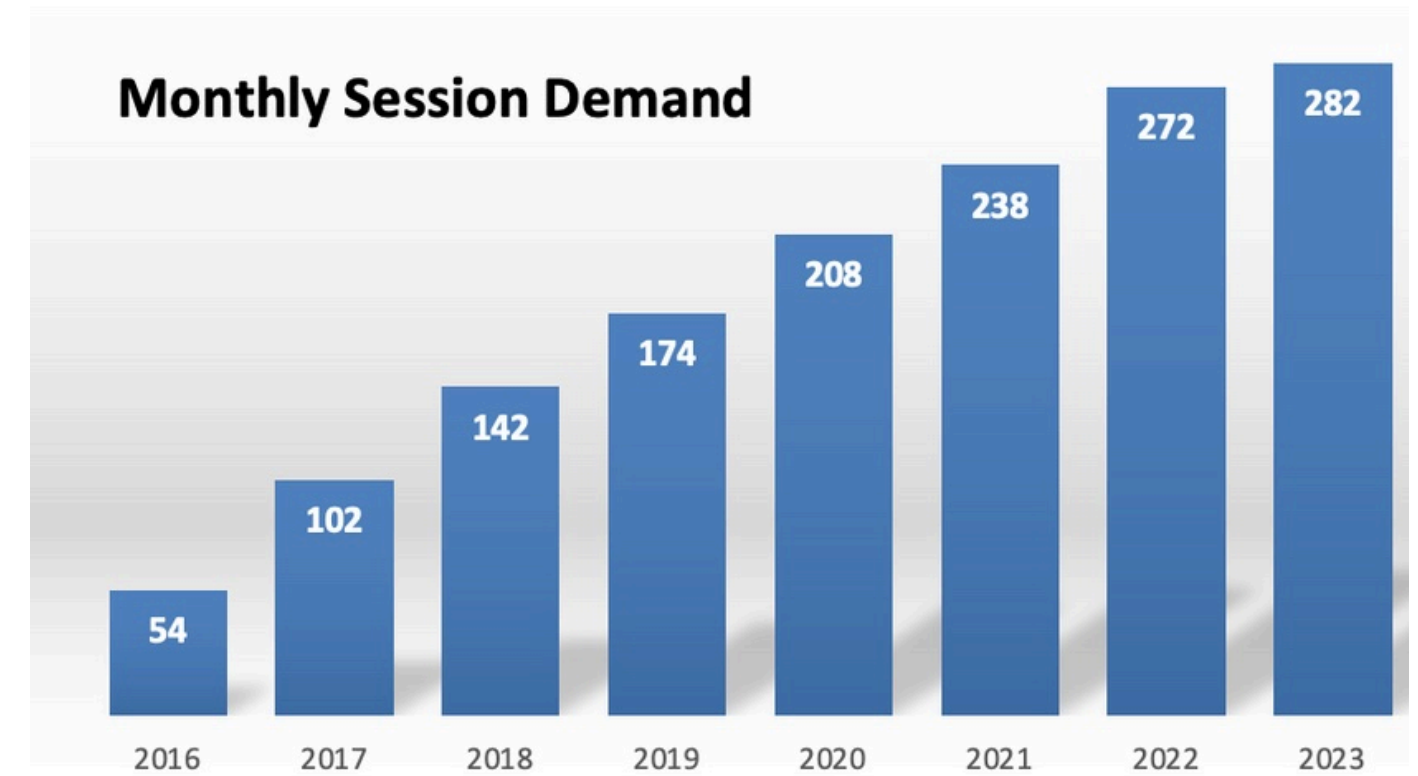

OUR IMPACT

We operate five days per week, 52 weeks per year, from two facilities. Traditional medical insurance, Medicare, and Medicaid do not cover this therapy. Now more than ever we need your help to continue meeting the needs of our rural population of underserved individuals living with paralysis and mobility impairment.

OUR INVESTMENT

We provide access to advanced technological equipment worth over \$1 Million.

- 2 x Galileo Neuromuscular Tilt Tables (Whole body vibration devices)
- 2 x Galileo Med L Vibrational Platform (Whole body vibration devices)
- 3 x Galileo Smart Mano Dumbbell (Arm/hand vibration devices)
- Galileo Kiddy Dumbbell for children
- EksoGT™ Bionic Exoskeleton Suit
- Indego® Therapy Kit Exoskeleton Suit
- Keeogo™ Dernoskeleton Suit
- Lokomat® Nanos Robotic Assisted Walking Device
- Lokomat® Pro V6 Robotic Assisted Walking Device
- 2 x NuStep® Recumbent Cross Trainer
- 2 x Neuro Rehab Virtual Reality Systems
- 1 x Concept 2 SkiErg Indoor Nordic Skiing System

OUR IMPACT

We are the only mobility program of its kind. We pride ourselves on giving the gift of mobility. We work every day to be a bridge between advanced technology and those in need. 64% of our athletes and their families are economically disadvantaged.

Through the generosity of our community, we give the gift of mobility and improve lives. It's that simple.
